

CPS Energy Commercial Demand Response Program Lunch & Learn

May 17, 2018 – 11:30AM – 1:00PM

CPS Energy Management Training Center
4514 Frank Bryant Lane, San Antonio, Texas 78220

FREE Event - Lunch served

Did you know the average commercial building wastes 30 percent of its energy? For bigger businesses, that wasted energy can mean millions of wasted dollars. CPS Energy's no-cost Commercial Solutions program can help you use less, save more and boost your bottom line. Join today and we'll help you identify energy-saving opportunities in your facilities, then convert them into savings by providing resources and incentives toward energy-efficient upgrades.

Program Details

- Traditional Demand Response(DR) runs June 1 through September 30. Automated DR is a year-round commitment.
- Participants are eligible for financial incentives in line with their energy reduction.
- Participating customers in traditional DR receive a two-hour advance notification of when to initiate and end curtailment. Companies participating in automated DR receive signals to trigger short-term, load-shedding measures.
- Reduction will typically be requested on weekdays between 3 p.m. and 6:30 p.m. However, program participants must be willing to curtail between 1 p.m. and 7 p.m.
- CPS Energy offers a DR audit to interested customers to identify energy reduction measures at their business.
